REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record, which is the most pertinent art found, fails to teach and/or fairly suggest the instant invention. The closest prior art is Japanese Patent Specification No. JP-09-026811 which teaches the use of silicone oil in cementitious compositions in amounts that encompass that which is instantly claimed however applicant has shown in the specification (specifically the examples and Tables 1 and 2) that the use of the claimed range produces a product possessing improved water absorption resistance and improved flexural strength. The distinctive range of the present invention, although partially overlapping the silicone oil content range disclosed in the reference of 0.05 to 3.0 wt %, demonstrates the unique combination of improved flexural strength and water absorption resistance that is not suggested or taught by the reference. See also applicant's arguments submitted with the response of November 09, 2004 for more details. Accordingly the claims are allowable over the reference.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony J. Green whose telephone number is 571-272-1367. The examiner can normally be reached on Monday-Thursday 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark L. Bell can be reached on 571-272-1362. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
